

BRUTE® UTILITY CONTAINERS

50% EASIER TO LIFT LINERS

THE BRUTE® IS DESIGNED WITH FOUR BUILT-IN VENTING CHANNELS that create airflow throughout the container. This air circulation eliminates the vacuum effect that occurs when lifting out liners in traditional containers. By reducing the pull force required to lift out liners by up to 50%, the BRUTE® improves productivity and reduces the risk of injury when lifting liners out of traditional containers.
