

Warm, dexterous and grippy

HAND PROTECTION

DexiFROst

Keith Purcell Distribution Supervisor - Transport Wholesale, trialed the DexiFrost in the cold New Zealand winter and had the following feedback:

- Great for use on fork trucks, both steering wheel and lever as well as joystick types.
- Superior to the normal latex dipped gloves for handling raw steel products, especially devanning and stacking.
- No issues with cuts, nicks etc when using knives or blades.
- Great for driving forklift outside, and for generally keeping the team's hands warm.

Overall, a great glove for my team here, especially during the colder months.

Microporous surface offers great wet/dry gripping power

Nitrile dots for increased skidproof ability in wet and dry conditions

Available in sizes from 7 through 11

Foam technology increases breathability.

Anatomically designed for comfort and fit.

High level of flexibility.

Combining warmth with exceptional dexterity

Brushed acrylic shell keeps your hands far from cold.

INDUSTRY APPLICATIONS

- Outdoor work- Road Workers
- General materials handling in cold conditions
- Construction in winter
- Commercial Fishing
- Machinery and Forklift Operators
- Warehousing and Cold storage
- Forestry / Agriculture
